## ABOUT THE CONFERENCE

We are pleased to invite researchers, academics, and industry professionals to the 2nd "International Conference on Application of Information Technologies in Engineering, Management and Science" (IEEE ICAI-TEMS), hosted in the historic heart of Pisa, Italy. Sponsored by the IEEE Technology and Engineering Management Society (TEMS), the ICAI-TEMS serves as a premier interdisciplinary platform for the dissemination of original research regarding the concepts, theories, and applications of cutting-edge information technologies across engineering disciplines, technology management, and science. Through its interdisciplinary approach, the conference aims to facilitate a dialogue between academia and industry, bridging the gap between theoretical advancements of information technologies and real-world application requirements. A dedicated industry forum will support the community's synergistic development, bringing together corporate leaders, academics, and students to address prevailing trends, market impacts, and the overarching challenges of fostering global business competitiveness through best practices in technology management and digital innovation.
